

PostMaster Enterprise Mail SyncBooks.

A typical requirement of a multi-location organization, using PostMaster Enterprise, is to have a consolidated list of all users in the organization. Similarly, a combined "Global Address Book" of all PostMaster Enterprise running across the country also proves useful.

PME-Mail SyncBook allows / facilitates such synchronization of Corporate and Master Global Address book in a multiple-location installation of PostMaster Enterprise.

Corporate Address Book provides a mechanism to consolidate the Local Address Book of PostMaster Enterprise from all locations and display the same in the Address Book option of the users' WebMail.

similarly, Master Global Address Book provides a mechanism to consolidate the Global Address Book of PostMaster Enterprise from locations and display the same in the Address Book option of the users' WebMail.

PME-Mail SyncBook component is built to automate and provide a centralized solution to consolidate the Corporate Address Book and Master Global Address Book. SyncBook works as a client-server system and is a part of the PME-Mail framework i.e. a plug-in to PME-Mail (like PME-Mail AntiVirus / AntiSpam For PME-Web).

Key Benefits

Regular, trouble-free and more importantly, local (and also through Internet) availability of Corporate Address Book and Master Global Address Book to all email clients which can then connect to the LDAP Server of PostMaster Enterprise.

Corporate Address Book and Master Global Address Book is available to all users who use PME-WebMail.

Since SyncBook operations are scheduled (no manual intervention), the Corporate Address Book and Master Global Address Book are always up-to-date.

How PME - Mail SyncBooks works

The SyncBook Server allows SyncBook Clients to upload address book details (email, contact name and other details) stored in the Local Address Book and Global Address Book of the respective locations.

After the upload is completed, the PME-Mail SyncBook Server will have consolidated both Local and Global Address Book

At this point, SyncBook Server allows the SyncBook Clients to download the Corporate Address Book (the consolidated Local Address Book) and the Master Global Address Book (the consolidated Global Address Book).

Once these books are downloaded by the SyncBook Clients, the internal database is updated and the Corporate Address Book and the Master Global Address are available locally.

Now, consolidate and make available, locally, your global and corporate Address Book with PME SyncBook!

SyncBook Server

The SyncBook Server module allows you to manage Locations and the Address List mapped to the location.

Locations Management covers maintenance of details of client machines that can connect to the SyncBook server and download address book details of users as uploaded by the SyncBook clients of the various locations.

AddressBook component of the SyncBook Server, enables an administrator to manage address book entries. Apart from the basic operations, facilities to import addresses or export addresses and search for addresses within the SyncBook database are also available.

SyncBook Client

The SyncBook client module allows you to synchronize your Corporate and Master Global Address book in a multi-location PostMaster Enterprise. The SyncBook client module can be set in scheduled mode so that it will connect to the SyncBook Server periodically and exchange data.
