

Release Notes

PostMaster Enterprise ver. 8.07

2014-15

Feature Enhancements

Responsive Webmail along with Multiple Compose Window

The PME webmail is enhanced to make it a more responsive interface. It now supports multiple compose windows which can be resized, minimize, restored and maximized. Also emails can be opened in new tabs or new windows, which will help in viewing multiple mails simultaneously.

The enhanced interface also makes it much more convenient to use other webmail features, e.g. using antispam, address-book, spools & public folders, updating personal info Robot rules have become easier to use. And apart from the convenience, the new webmail interface is lighter and faster than before.

Note: Best viewed in Mozilla Firefox, Google Chrome, Internet Explorer 10 and above.

Change Units from Kb to Mb for FTP Quota Limit

In PMEv.8.07, FTP quota limit is calculated (and displayed) in MB's and not KB's. Accordingly a user can now be assigned an FTP quota limit upto 9999999 MB.

Issue Fixes

Mailing list

- An issue in the display of the Real Name strings in Mailing List has been fixed.
- An issue relating to tag replacement while uploading an .eml file in PME Mailing List has been fixed.
