Release Notes – PostMaster Express ver.7.09

Release Date: March-14, 2010

The PostMaster Express Release Notes 7.09 provides details about new enhancements and some important defect fixes in **PostMaster Express Release 7.09**.

1   Enhancements and Defects Fixed

1.1   Enhancements to PostMaster Express – v7.09

1.1.1   Security

- **Web DefFiles**

  QLC will now provide a master list of categorized URLs. On download and integration, these work as Web URL filters for all the users (as applicable at a Global level). Once set, this check can be overruled only by the administrator. The administrator can download the desired filters, depending on the requirement, by choosing from the category of URLs. The list will be automatically updated.

  To activate filters from the web console:

  a.   Go to the **WebAdmin>Security>Proxy Filters** section.

  b.   Click **Mode** in the **URL Filters** tab.

  c.   Select **QLC** from the **Mode** drop-down list.

  To activate filters from the user interface:

  a.   Go to the **Security>Proxy Filters** section.

  b.   Click **Mode** in the **URL Filters** tab.

  c.   Select **QLC** from the **Mode** drop-down list.

  This is intended to restrict Internet usage to productive purposes and to enhance security.

2 PostMaster Express 7.09 Release Details

2.1 Release Details

Field	Description
Product/Solution Name	PostMaster Express
Release Type	Minor release
Shipping Status	General Availability
Release/Version	7.09
Customers	All
Installation Type	Complete Install and Patch
